GOVERNMENT AGENCY:

Why Industrial Digital Transformation?

You are invited to join us at the Industrial Digital Transformations – Manufacturing IT OT Convergence webinar series!

Industrial Digital Transformations webinar is a progressive online event that discusses the challenges and opportunities of digital transformation among core industries in Malaysia. Under the MyDigital program roadmap announced by the government, Digital Transformation is imperative to prepare the industries to surpass again in post Covid recovery and remain dexterous. MyDigital blueprint is a cognitive government's master plan towards the realization of the Fourth Industrial Revolution (IR 4.0). The government has set its end goal at recording the highest economy towards the decade's end and intends to use local advances with digital solutions, as indicated by the Malaysia Digital Economy Blueprint. From its collaboration with Huawei, it hopes to adopt digital transformation, implement full network connectivity to all homes which will enable students to study fully online, and create over 500,000 new opportunities before 2025. Our ultimate goal is to help you adopt an innovative master plan capitalizing on Digital Technology in the world of Digital Transformation. We have a host of ideas on how you can manage this and stand out by adopting a planned Digital Development strategy. Owners or tech teams from various industries may leverage this platform to seek help or opinions in digitalization

SPEAKERS

11 am

MIDA Facilitation and Industry4WRD Initiative

| En. Shazri Hidayat Abd. Shukor, Assistant Director,
MIDA Selangor |

Schedule Item Body

11:25 am

What are the potential challenges /benefits of Adopting the Industrial Internet of Things (IIOT) System?

| Mr. J.A. New, Chief Executive Office, HEXA IoT |

The IIOT has transformation benefits by restructuring industries like manufacturing, transportation, and agriculture. In the modern world, it is relatively common to purchase sensors and analytics needed to produce at full tilt in the world of competition. IIOT brings big promises to organizations by empowering their production processes, boosting data-driven decisions, minimize downtime, more frequent maintenance monitoring, improve oee and more. HEXA IOT will share views on this, together with successful customer testimonials.

11:45 AM

Benefits of moving Beyond ERP with Industry 4.0

| Mr. Yeap Kong Chean, Chief Executive Office, YGL
Convergence Berhad |

Enterprise resource planning (ERP) fundamentally is the first system tool to integrate all the core business processes within the business organization. The next revolution of industries, Industry 4.0, is the current trend of automation and data exchange focusing on machines and IIOT devices. The YGL representative will share YGL Solution which is referred to as Beyond ERP in this session.

12:05 PM

Introduction of Cloud TM ONE α Edge, the only local Cloud & AI infrastructure in Malaysia, jointly developed by TM ONE & Huawei
