Smart Warehouse ROI

Increase stock accuracy to 90%

Increase warehouse labour efficiency to 70%

Eliminate the chances of taking wrong stock or quantity

Smart Warehouse: From Manual Work To An Exciting Hi-Tech Journey

Smart warehouses embrace new technologies, such as RFID, IoT, smart glasses, robots, drones and others to ensure all warehousing and related processes – from storage to shipping – run as efficiently as possible.

5 Reasons for using Smart Warehouse

Boost Productivity

Automate warehouse processes to speed up the picking, scanning and moving of goods, enable users to reassign personnel to value-added tasks.

Avoid Human Errors

Technology helps increase accuracy.

Reduce Costs

Improved productivity, reduce errors and satisfied customers help to save costs/drive revenues. By streamlining warehouse processes, users can optimize stock and shipping costs effectively.

Ensure Happy Customers

Customers will appreciate the rapid, error-free delivery of undamaged goods.

Leapfrog your Competitors

A smart warehouse is a hub that boosts efficiency and speed throughout the entire supply chain – for an edge over the competition

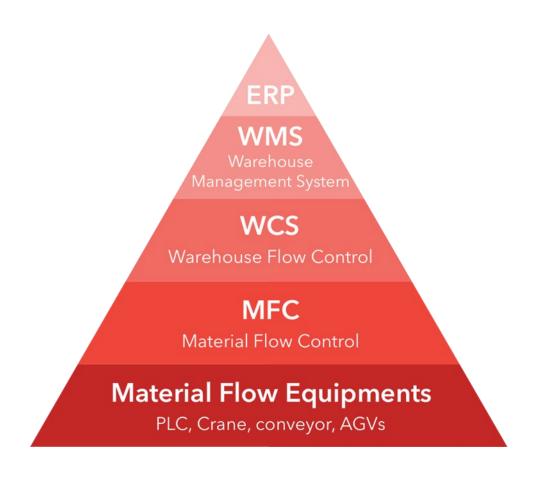

How We Can Help?

Smart warehouses are slowly gaining pace; the possibilities are numerous. As an experienced IT services provider, YGL has deep expertise in supply chain and warehouse processes. Based on that experience, we can help you **analyze your existing processes** and define your needs.

In the next steps, we will **recommend solutions**, **implement** these and, if needed, **integrate** your system with third-party RFID or voice picking solutions.
