

Donation to PERTUBUHAN KEBAJIKAN NASYIATULAI SIYIAH, PURE LOTUS HOSPICE OF COMPASSION & PENANG HINDU ASSOCIATION through collective effort of our staff and customers from 'Circle of Love' coin box and coffee on 28 June 2022.

YGL ERP Improves Overall Equipment Effectiveness

OEE – Overall equipment effectiveness is regarded as one of the most critical metrics for measuring manufacturing productivity. A high OEE score means you're creating quality parts as fast as possible with minimal stop times. Though manufacturers typically aim for at least 85% OEE, many stray well behind this goal, stuck in the 40-60% range.

The only reliable method of calculating OEE is through utilizing enterprise resource planning ([ERP](#)) software. ERP serves as a central hub for enterprise data from the top floor to the shop floor. As YGL ERP vendor add more cutting-edge tools to their solutions, manufacturers not only gain a more accurate picture of OEE but also discover new methods to optimize productivity. Below, we describe the ERP features and capabilities that can help you improve OEE.

YGL ERP can be tightly integrated with Industrial Machine to provide in-depth insights into your production performance. YGL ERP solution has integrated with German Machine at PSDC Industry 4.0 lab.

Innovation in manufacturing through industry 4.0 using YGL ERP software

The Right ERP Key Enabler of Industry 4.0 | YGL Nervous System

Manufacturers in the fourth industrial revolution have technologies at their fingertips that their predecessors could only dream of. Just as water and steam powered the first industrial revolution, now data powers the fourth industrial revolution. At the heart of manufacturing organizations are ERP application systems that manage this ever-growing volume of data.

We have touched on a number of fundamental ERP characteristics to keep in mind when looking for an ERP system. This is because if the ERP system has checked off a number of these pillars of Industry 4.0, then it ensures that an organization will be able to participate in this next industrial revolution.

YGL NERVO can expertly deploy, monitor and troubleshoot a new ERP system that centralises operations at your enterprise.
