23 July 2022

YGL Collaborate with MPC to conduct a seminar on topic “Navigate Your Smart Warehouse Industry 4.0” at [Perbadanan Produktiviti Malaysia\(MPC\), Bertam, Kepala Batas](#).

Encik Azrol, CEO of MPC Penang presented **The Importance of Digital Technology Transformation for Productivity Improvement**. YGL Senior Manager Mr. Isaac Yong had shown “How a WMS can positively impact your business” and **How A Smart Warehouse May Help You Streamline Your Business Through Real Life Case Study – Biogreen** to the audiences.

A: **Demo on Smart Warehouse** by Mr. Yeap Seong Sun and the last session presented by Sophie Business Development Manager David Low on the AGV machines.

Smart warehousing requires much more than a run-of-the-mill Warehouse Management System (WMS). It needs a modern warehouse software that can act as the central operating system or control tower to orchestrate the flow in real-time .

YGL System can serve as the glue between YGL ERP, YGL WMS, Shipping software on one end, and all the sensors and automation hardware on the other. Most importantly, the central operating system should have the intelligence depth that can leverage advanced analytics to make predictive.

In a nutshell, forward-thinking businesses are catching up with the idea of smart warehousing, slowly but surely. In fact, several businesses are substituting spreadsheets, legacy systems, and other rudimentary processes with some of the mentioned smart warehousing components. With the rapidly evolving consumer expectation in conjunction with the disruptions caused by the current pandemic, building a smart warehouse is essential to stay competitive.
