

JULY 2025

We were honoured to welcome Mr. TS Koay, Managing Director of DELL Malaysia, on a courtesy visit to the YGL Corporate Office. This visit marked a significant step toward strengthening the strategic collaboration between DELL Technologies and YGL.

During the session, YGL shared insights into our expertise in digital transformation solutions. The meeting provided a valuable platform for both parties to explore synergistic collaboration opportunities. Discussions focused on how YGL and DELL can jointly deliver scalable, future-ready enterprise technology solutions by combining YGL's industry-specific know-how with DELL's cutting-edge infrastructure and hardware capabilities.

This engagement underscores a shared commitment to driving digital innovation, enhancing operational efficiency, and supporting Malaysia's digital economy agenda. We look forward to building on this momentum to deliver greater value to our clients and partners.

4 July 2025

We were honoured to welcome the Chief Technology Officer of Penang Skills Development Centre (PSDC) to YGL for a courtesy visit!

During the meeting, discussions were focus around a potential partnership between YGL and PSDC in the development and rollout of an AI Industry Program, aimed at enhancing workforce readiness and accelerating digital transformation within the manufacturing and industrial sectors. The program seeks to empower professionals with practical skills in AI adoption, focusing on areas such as predictive maintenance, smart manufacturing, digital twins, and AI-driven ERP solutions. Both parties exchanged insights on current industry trends, talent development gaps, and the importance of hands-on industry projects in bridging the skills divide. YGL showcased its technology capabilities and real-world AI use cases implemented in ERP and warehouse management systems, aligning with PSDC's mission to develop future-ready talent through industry-driven learning models.

Together, we aim to support Malaysia's ambition to become a regional hub for advanced technologies and smart industry solutions.

On 24th July 2025, YGL hosted an exclusive knowledge-sharing session titled “Unlocking Operational Excellence with AI: What Manufacturing Leaders Need to Know.” The event brought together key stakeholders from the manufacturing sector, all eager to explore how artificial intelligence is revolutionizing operations, driving efficiency, and enhancing decision-making across the value chain.

Speakers:

- ◆ Joshua Teh – AI Solutions Architect
- ◆ Yeoh Chew Yee – ERP & Data Analytics Specialist

Both speakers delivered engaging presentations highlighting the transformative power of AI in the manufacturing industry. Joshua Teh provided a strategic overview of how AI technologies such as machine learning, predictive maintenance, and intelligent automation are enabling manufacturers to reduce downtime, streamline operations, and optimize production planning.

Meanwhile, Yeoh Chew Yee shared real-world case studies and insights into how AI, when integrated with ERP systems and business intelligence tools, can uncover hidden patterns in data, enabling smarter forecasting and proactive decision-making. He demonstrated how manufacturers can leverage these capabilities to improve supply chain agility, ensure quality control, and boost overall productivity.

The session also featured interactive Q&A segments where participants explored practical challenges and actionable strategies for implementing AI in their own operations.

The event reinforced YGL’s commitment to driving digital transformation across the manufacturing ecosystem, equipping industry leaders with the tools and knowledge needed to thrive in an AI-driven future.

Why Smart Warehouse Solutions Matter for Your Business
Looking to scale your operations and reduce costly mistakes? A Smart Warehouse Solution is the game-changer you need!

- ✓ Boosts overall efficiency
- ✓ Reduces manual workload
- ✓ Tracks inventory in real-time
- ✓ Prevents stockouts and delays
- ✓ Minimizes human error
- ✓ Increases order accuracy.

From inbound to outbound, enjoy seamless, automated operations that save time and money. Stay ahead with smarter decisions powered by real-time data and automation. Don't let outdated systems slow you down — transform your warehouse today!
