

Dell Technologies Forum 2025

Date: 10 September 2025, Wednesday

Venue: One World Hotel, Petaling Jaya, Selangor

YGL, as an authorised Dell partner, demonstrated how their solutions integrate with Dell's portfolio of products and services. The company's participation highlighted their focus on:

- Industry 4.0 and AI: YGL's solutions, particularly in manufacturing, logistics, and supply chain management, are designed to help businesses adopt Industry 4.0 principles and harness the power of AI to optimize operations.
- Intelligent Enterprise Systems: The company showcased their intelligent enterprise systems and how they can be used for digital transformation, from the shop floor to the boardroom.
- Strategic Partnerships: The presence of both YGL and Ingram Micro at the same booth suggests a collaborative effort. Ingram Micro is a global technology distributor, and its presence alongside YGL and Dell likely signifies a channel partnership to deliver these solutions to a wider market. This collaboration allows for a comprehensive offering, combining YGL's software and services with Dell's hardware, all distributed through Ingram Micro's network.

The Dell Tech Forum serves as a platform for companies like YGL to demonstrate their expertise in deploying Dell's technology to address modern business challenges, such as data management, cloud integration, and cybersecurity.
