AI Enablement Experience 2026

Navigating Tokenomics & Next-Gen Architecture

As part of YGL Convergence Berhad's commitment to innovation and digital transformation, our team participated in the **AI Enablement Experience: Connecting Partners in Penang** on 22 June 2026. Hosted by Ingram Micro with Dell Technologies and Microsoft, the event explored the future of enterprise AI, modern IT infrastructure, and intelligent business solutions.

Understanding the Economics of AI

One of the key topics discussed was AI Tokenomics—the growing cost of AI usage within organizations. As businesses increasingly rely on AI-powered tools, token consumption is becoming a significant operational expense, much like cloud computing costs today.

Industry experts shared how organizations can better manage these costs by adopting Edge AI solutions, allowing AI processing to run locally on AI-powered devices instead of relying solely on cloud-based services. This approach helps reduce recurring AI expenses while improving data privacy, security, and performance.

The Rise of AI PCs

Dell and Microsoft highlighted that AI PCs are expected to become the standard enterprise device by 2028. Equipped with dedicated Neural Processing Units (NPUs), these next-generation computers will enable faster and more efficient AI processing directly on users' devices.

This trend reinforces the importance of developing enterprise applications that are ready to leverage on-device AI capabilities in the years ahead.

Building Modern Enterprise Infrastructure

Another major focus was the evolution of enterprise IT infrastructure. As organizations adopt AI, containerized applications, and hybrid cloud environments, businesses require infrastructure that is both flexible and easy to manage.

Dell introduced its modern Private Cloud architecture, enabling organizations to scale resources independently while maintaining simplified operations. The platform also supports multiple virtualization environments, providing greater flexibility and reducing dependence on a single technology ecosystem.

What This Means for YGL

The insights gained from the event will continue to strengthen YGL's technology strategy and product innovation.

Moving forward, YGL remains committed to delivering intelligent, future-ready solutions by:

- **Optimising AI-enabled ERP and WMS solutions** through a balanced cloud and edge computing approach to improve performance while controlling operational costs.
- **Supporting hybrid cloud environments** that offer greater flexibility, scalability, and security for enterprise deployments.
- **Enhancing ESG data management capabilities** to efficiently handle growing volumes of sustainability and environmental reporting data.

Moving Forward

Events like the AI Enablement Experience reinforce YGL's dedication to staying at the forefront of emerging technologies. By continuously learning from global technology leaders and embracing the latest innovations, YGL is well-positioned to help businesses accelerate their digital transformation journey and build smarter, more resilient enterprises for the AI era.

Building Bridges Across Borders

Tongxiang City Delegation Visits YGL to Explore Future Collaboration

YGL Convergence Berhad was honoured to welcome a distinguished delegation from Tongxiang City, Zhejiang Province, China, to our corporate office on 22 June 2026. The visit marked an important milestone in strengthening international partnerships and exploring future collaboration in digital innovation and sustainable business development.

Representing YGL, Ts Dr Celvin Tan and Mr. Humphrey Ho hosted the delegation and shared insights into YGL's enterprise solutions, digital transformation expertise, and vision for future growth. Both parties exchanged ideas on potential collaboration opportunities and identified common interests across technology and industrial development.

Key Areas of Discussion

Digital Economy & Data Governance

Exploring enterprise digitalisation, data management, and smart city initiatives.

Smart Manufacturing

Leveraging YGL's ERP, MES, and Smart Warehouse Management System (WMS) solutions to support Industry 4.0 transformation.

ESG & Sustainability

Supporting businesses with ESG compliance, sustainability reporting, and carbon management initiatives.

Investment & Business Growth

Identifying opportunities for strategic partnerships and expanding collaboration within the Yangtze River Delta region.

Looking Ahead

The visit concluded with both parties expressing strong interest in deepening future cooperation. YGL remains committed to fostering international partnerships that drive innovation, accelerate digital transformation, and create long-term value for businesses across the region.

We sincerely thank the Tongxiang City delegation for their visit and look forward to many exciting opportunities ahead.
